

# Canterbury Durite Dashing Spar

## Product guide

**Heidelberg Materials Canterbury Durite Dashing Spar consists of 3mm-8mm multi-coloured calcined flint.**

### Applications

For use as dry dashing, solar reflective roof dressing, pre-cast panels, epoxy-based coatings, slip resistant floor finishes, exposed aggregate paving, and rolled dressing for drives and pathways. This product is suitable for fishponds or aquariums. We recommend that this product is re-washed in clean, fresh water prior to use. Decorative aggregates are natural products and variations in size and colour may occur due to geographical and processing variables.
