

# Granular Sub Base

## Product guide

**Heidelberg Materials Granular Sub Base is a MOT Type 1 crushed aggregate conforming to the requirements of BS EN 13285 Aggregates for unbound and hydraulically bound materials for use in civil engineering and road construction.**

### Application

Suitable for forming sub base or base layers to support other construction such as concrete drives or other paving materials. Will only perform if applied to suitably prepared sub grade and if compacted to form a dense layer. May also be combined with cement to produce a higher bearing capacity.
