

High Strength Cement

Product guide

Heidelberg Materials High Strength Cement 52,5N, is a quality assured Portland Limestone Cement and is manufactured to comply with the requirements of EN 197-1 CEM II/A-LL strength classification 52,5N. High Strength 52,5N incorporates quality-controlled limestone to produce a high-performance cement with enhanced sustainability credentials.

Applications

Heidelberg Materials High Strength Cement 52,5N is a commonly used cement for a wide range of applications. These applications cover but are not limited to, general ready-mixed concrete, high strength pre-cast and pre-stressed concretes, concrete block paving (CBP), grout, mortar, render and screeds.

Mix designs

Concrete mix designs need to be adapted to suit individual circumstances. It is strongly recommended that trial mixes are carried out prior to commencement of work to ensure that the mix design and material combinations meet the requirements of the specification and method of use.
