

Decarbonising fleet through the use of telematics

3rd June 2026, 11am to 1pm

[Click here to book your place](#)

Decarbonising vehicle fleet is essential in meeting net-zero targets, but can also be costly. In partnership with Finnings, this seminar covers how telematics, care and maintenance can reduce vehicle emissions. Lunch and networking is included.

Places are limited and demand is typically high. To ensure we can accommodate those most able to attend, we ask that you only register if you intend to join us in person. Unconfirmed places may be released to a waiting list.

Heidelberg Materials evoHub,
Techspace,
140 Goswell Road,
EC1V 7DY, London

Easily accessible from
Faringdon and Barbican
underground stations.
