

Making construction nature-positive seminar

8 October 11:00 - 13:00, lunch provided

Construction materials and projects shape the environments in which we operate. Understanding the role of **Net Gain Credits** and **Biodiversity Action Plans** in construction projects can guide how clients, contractors and the whole supply chain achieve positive outcomes for nature from the outset.

Join us at our evoHub for an **in-person** seminar where we will share practical examples and real-world case studies. We'll discuss and demonstrate how research, innovation and collaboration can enhance biodiversity, support habitat creation, and contribute to wider environmental objectives.

Programme and presenters

Join Andy Duncan, Principal Landscape Manager, Heidelberg Materials UK, as we discuss:

- The key environmental and biodiversity considerations associated with construction materials and projects
- How research and land remediation activities can deliver measurable benefits for wildlife and habitats
- The role of Biodiversity Net Gain (BNG) and Net Gain Credits in demonstrating environmental outcomes
- Opportunities for collaboration, innovation and long-term environmental stewardship

How to find us

We are a five-minute walk from Barbican, Farringdon or Old Street underground stations.

Our address is
