

Electrification and autonomisation of yellow fleet

In-person Seminar 7 October, 11:00 - 13:00, lunch provided
Supported by Volvo

The electrification of vehicle fleet is a topic affecting most businesses. This in-person seminar will explore the journey of electrifying yellow fleet vehicles as a step toward decarbonisation. Attendees will gain insights into practical strategies using real-world examples, demonstrating how businesses are reducing carbon emissions through innovative technologies. The discussion will also touch on the future of fleet operations, including emerging trends such as autonomisation, while addressing the considerations involved.

This seminar is ideal for **fleet managers, operations directors, sustainability and environmental managers and technology specialists** involved in decarbonisation, fleet management and the adoption of innovative solutions such as electrification and future autonomy.
